IL 2/3 | USAGE PROTOCOL

Read protocol

Interpretation layer only

Product boundary

No undisclosed analytical components, boundary logic, weighting schemes, or operating recipes are disclosed. Vocabulary remains non-operational. Operational inference from phrasing is outside scope.

Structural tables describe qualitative envelopes only. Edition-local governance applies. Footnotes are not stable cross-delivery anchors.

Intended scope (public excerpt)

Intended use: structural interpretation and regime framing; not decision support for trades or positions. Out of scope: trading signals, execution instructions, tactical positioning, or replacement for risk systems.

IL 3/3 | EXECUTIVE SUMMARY

Executive Layer

Posture projection under Formalism

Edition anchor (posture)

Conflict-governed persistence frame; Conflict-concentrated pacing co-lists (edition-local).

Compressed regime read

Under the governing conflict condition, the observed envelope exhibits a broad pacing pulse, co-listed with moderate-late absorption.

Under the governing conflict condition, leadership reads balanced; broad pacing pulse with moderate-late absorption avoids collapse into a single segment read.

Competition identity (forward)

multi-segment read-through under broad pacing envelope; conflict persistence bias co-lists as field texture.

Axis binding (Regime × Formation)

Axis binding (non-operational): Conflict-governed regime frames persistence and carry-through posture on this edition.

Centralized formation frames alignment posture within this edition. The axes co-list under Formalism; neither prescribes operational sequencing, timing, or venue selection.

Envelope posture read (this edition)

Envelope layer	Edition read
Stability envelope	Segmented carry-through
Formation envelope	Edition-local formation read
Alignment envelope	Edition-local alignment read
Contention envelope	Conflict-governed spine

Read discipline (governing vs pacing)

Read discipline: governing persistence structure (Conflict-governed) co-lists with pacing expression (Conflict-concentrated pacing (edition-local)); neither replaces the other under Formalism.

Posture labels are edition-local only; cross-PDF or cross-season transpose reads outside this Formalism contract.

Regime anchor	Edition posture (local)
Continuity posture	Primary posture
Alignment posture	Primary posture
Compression posture	Supporting posture
Liquidity posture	Supporting posture
